Dear Professor Pinder,

RE: Sponsorship of the ICCR Breast datasets

The International Collaboration on Cancer Reporting (ICCR) would like to warmly acknowledge your generous donation of \$5,000 AUD to support the new editions of the ICCR Breast datasets. It is very welcome and greatly appreciated as it goes towards the ICCR's organisation expenses, including the provision of a project manager, which is vital for development of the datasets to occur in a timely and quality-assured manner.

The ICCR has formally recognised Association of Breast Pathology's (ABP) contribution to our dataset development by:

- a) Inclusion of the ABP logo on the ICCR Breast datasets, and
- b) Recognition of involvement on the ICCR website. This involves displaying the ABP logo as an allied organisation.

We are very grateful for your support of our dataset development work.

Best regards,

Professor Kieran Sheahan
President, ICCR
